ScreenSaverManager.com SQL Select from a Table and a Column of a Table returned from a Function Using Visual Studio, TSQL, MS SQL Server 2008 This is what I am trying to do: I have a table: Notifications that has an ID and a

SentDate. I have another table: Users that has a UserID, FirstName, LastName, Username. I have a stored procedure called GetAllUsers that returns the entire Users table and another called GetNotifications that returns a single row of Notifications, that I want to use to update the User table with the user ID that got returned from GetNotifications. So I want to do something like this:

SELECT GetNotifications(@UserID) SELECT u.UserID, u.FirstName, u.LastName INTO #Results FROM Users u WHERE u.UserID IN(SELECT GetNotifications(@UserID)) A: For your first query to run you need to set the value for the @userid parameter that is used

System Requirements:
